

The Differences Between A Home Elevator VS A Home Lift

Item	Veu Home Elevator by Vertechs	Home Lift
Landing Doors	Full automatic door operation.	Swing door manual operation.
Cab Door	Full automatic door operation.	Manual accordion plastic or wood gate.
Space between Car Door and Landing Door	(30mm) 1 1/4" max space. Impossible for pets or children to be trapped in.	5" sometimes more. Children or pets can enter this space with possible fatality.
Electrical Control System	360 Controls Systems made to commercial standards and pre-approved by elevator authorities.	Made with basic electrical components. Limited safety redundancies.
Motion Sensors	Full range infra-red light curtain. Provided as a standard.	Provided as an option.
Door Interlocks	Integrated with automatic doors and practically impossible to by-pass.	Very unattractive and easily tampered, allowing lift to run with the doors open.
Operation	Selective Collective.	No Memory.
